

Drone Pilot Test Prep Course

Drones are now a part of everyday life - both at home and work. To legally fly most drones under FAA Part 107 you need to have a pilot license. This requires that the pilot pass the drone pilot knowledge test. This course is designed to prepare students to better understand the information that will be tested on the exam and provide a hands-on experience. Students will be taught regulations, airspace classification and operating requirements, weather, loading and performance and operations specifics. The class is a total of 12 hours of classroom and 4 hours of hands-on training. Drones will be provided for the hands-on portion.

Cost: \$325.00*

Upcoming class:

Friday, September 10 and 17, 2021

or

Friday, October 15 and 22, 2021

Class meets from 8:00 am – 5:00 pm
